

February 18, 2016

Dear Whitney,

Thank you for the call today and bringing me up to speed on the current status of the Mather Sports Village project. Since we have known each other for 4+ years now, it is my intention to fully support the sports park in every way I can.

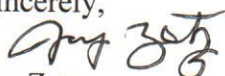

As you are aware, my company, All World Sports, owns and operates a baseball, fastpitch and softball program that has over 2,000 teams which includes over 25,000 athletes. We also have our own umpire group that works specifically for us which includes about 200 umpires. We not only operate in the Northern California region, but we also have over 2,500 players in the Reno/Carson City area that play with us annually and we are always interested in having additional playing fields for our events.

Furthermore, as we discussed, my company plans to provide the softball/fastpitch/baseball management to your facility once it opens.

Because of our presence regionally, and now as we move our program to the national level, we will be able to bring hundreds of teams to the Mather Sports Village park on any given weekend utilizing all of the Mather Sports Village fields for our tournaments. It goes without saying that our tournaments will bring significant economic benefit to the Mather area.

All World Sports fully supports the Mather Sports Village Sports Park and we look forward to working with you once the facility is completed.

Sincerely,

Jay Zetz
